In 1996, AutoCAD was used for the following projects: AutoCAD was used in the 2005 film Chicago, the latest to win an Academy Award. In 2006, AutoCAD went from 2 million to 8 million users in 5 years. The forecast for 2009 was 17.5 million users. The key growth drivers for 2010 are: AutoCAD 2010 was shipped on December 22, 2009, and is currently the most widely used commercial CAD program in the world. Major product milestones Customizable user interface In 1992, AutoCAD first shipped with a customized user interface. The original user interface was based on Gantt charts, and its design is described as: In 1992, the first mass-produced application with a customizable user interface was the FoxPro 1.0 Beta. The new interface was based on a general-purpose graphical user interface called Indigo, which allowed the user to customize the appearance and functionality of an application. In 1995, the application set the custom user interface as a major feature with the release of AutoCAD 95. AutoCAD 95 also introduced a feature called "Save", where customized interface states and settings can be saved to a file. In 1997, the company presented an enhanced version of the user interface. The new interface was based on a graphical user interface called "EDM", a.k.a. "EDM Plus". The EDM Plus user interface was originally called "EDM 2" and was designed by the company's internal AutoCAD User Interface group. In 1997, AutoCAD introduced a feature called "EzView", which is a front-end that provides a combination of automatic and a user-editable presentation of technical data about drawings and files. In 1998, AutoCAD added the ability to bring AutoCAD to workstations with Windows 95. In 1999, AutoCAD introduced a feature called "AutoCAD Vault". In 2000, the company added a feature called "AutoCAD Windows

2000". In 2001, the company moved from Digital to AutoCAD 100. In 2001, the company added a1d647c40b

## What's New In?

New style and tag attributes with AutoLISP. AutoCAD now supports AutoLISP expressions to define styles and tag attributes and apply them to objects. (video: 1:15 min.) AutoCAD 2020 Compatibility: Objects in your CAD drawing that you draw with the new AutoCAD 2023 + AutoLISP feature are compatible with earlier versions of AutoCAD, including AutoCAD 2020. AutoCAD 2023's new object classes are compatible with AutoCAD 2020's object classes. In AutoCAD 2023, text imported from a drawing created with earlier versions of AutoCAD is now preserved in the Import command, even if you go back to earlier versions of AutoCAD after making changes. In AutoCAD 2023, the Translate command converts a linetype with text data as you import objects from other drawings. In AutoCAD 2023, the Translate command now accepts a path as its destination. New Import and Update Methods: Importing and updating drawings with the Import or Update command now supports: Automatic detection of new or deleted objects and the application of the most recent changes to the drawing. (video: 3:13 min.) Detecting new or updated linetypes and applying the most recent changes to the drawing. (video: 4:04 min.) Detecting new or updated block styles and applying the most recent changes to the drawing. (video: 5:37 min.) Support for importing from drawings with the.dbf or.ldf file extension. (video: 1:10 min.) In place Import and Update: In place objects are automatically detected and imported when you insert them, move them, or translate them. The imported objects are automatically synchronized with the original drawing. Reverse Merge: You can now reverse the order of objects that are imported with the Reverse merge command. In AutoCAD 2015, for example, you could create a drawing with a ring that contains several objects (for example, holes and rectangles) as shown in Figure 1. Figure 1. Reverse merge allows you to reverse the order of objects that are imported. After you've created the drawing, you can reverse the order of the objects by using the Reverse merge command (Select command>Object>Reverse merge). In this example,
